

ABC-LAUNDRY CONCENTRATE

Concentrate prepared for the manufacture of liquid detergents

DESCRIPTION

The ABC-*Laundry* CONCENTRATE is specially formulated to elaborate liquid detergents. Add tap water to the concentrate and obtain the regular ABC-*Laundry*, which is ready to be packaged and marketed, making it ideal for use and development of Small and Medium Businesses (SMBs). ABC-*Laundry* liquid detergent used for industrial or residential machines. Avoids dust contamination, easy handling and more concentrated than the powder. Good for white or light fabrics.

1. Active detergent
2. Optical brightener
3. Softener

FEATURES

Appearance: Slightly thick paste with weak fluorescence.
Color: Yellowish
Odor: Floral
Ingredients: Surfactants, optical brightener, solvent spotter, softeners.

DIRECTIONS

Equipment

Depending on the amount to be prepared, use either plastic buckets of 18-20 liters and a small wooden paddle, or plastic drums of 200 liters with a larger wooden paddle or a mechanical stirrer. For larger quantities use mixers with agitation, preferably stainless steel.

To obtain the regular ABC-*Laundry* the mixing proportions are as follows:

35% on weight of ABC-*Laundry* CONCENTRATED
65% volume of water

Mixing procedure

- Place the recommended amount of water in the container
- Slowly add the concentrated AB-*Laundry* paste.
- If manually mixed and smaller amounts, stir gently for at least 20 min to gain complete homogeneity.
- With mechanical agitation mix for about 10 min until homogeneous.
- The product is ready for packaging

The product obtained corresponds to the regular version of ABC-*Laundry* manufactured by PROQUIPUSA (Productos Químicos Industriales de Puebla S.A de C.V). For more information and technical data visit the web site at <http://www.proquipusa.com>.

Marketing packaging suggested

Plastic containers of 2 or 5 liters labeled according to local legislation.
