

ALOE VERA POWDER 200

Multi-purpose powder

DESCRIPTION

Aloe Vera powder is a derivative of the Aloe *Barbadensis* plant.

Due to the high amount of water on the plant juices, the powder is a versatile derivative as it reduces transportation costs.

The Aloe juice is stabilized and is first treated with active carbon to reduce the odors and some impurities, and after filtered, it undergoes a vacuum evaporation process of low temperature, and finally to obtain the powder, the remaining moisture is eliminated spray drying.

FEATURES

Appearance:	Fine powder ranging from off-white to beige coloring
Odor:	Characteristic
Ph:	from 3.5 to 5.0 (Solution 0.5% at 20 C)
Total solids as Aloe:	100%
Water content:	6 to 8 %
Pathogens:	Negative

USES

Aloe Vera has multiple applications in the Cosmetics and Personal Care segments, including formulations for skin treatments, facial moisturizers, cleansers, skin softeners, sun and after-sun care products among others. It is also widely used for tonics and numerous pharmaceutical formulations.

DIRECTIONS

Considering the high powder concentration, it is recommended in amounts of 0.05%.

PRECAUTIONS

Keep in a dry and cool-temperature room. Avoid direct sunlight exposure, as the powder tends to darken.

PACKAGING

Sealed plastic bags of 5, 10, and 20 Kilo.
Larger amounts can be provided upon request.
