

**PINGUIN (PINGÜINO) CONCENTRATED**

**Anti-freeze for radiators**

**DESCRIPTION**

---

Antifreeze PINGUINO contains antioxidant and anticorrosive additives. The formula is based on ethylene glycol, which endures winter's low temperatures and keeps it liquid. The contained additives avoid the oxidation of car engine components, specially the radiator.

**FEATURES**

---

Appearance:	Liquid slightly thick
Color:	Greenish yellow bright
pH (10%):	12
Boiling point:	150 C
Ingredients:	Ethylene glycol, anticorrosive additives, metal protectors (BASF), borax, caustic soda, silicates, water

This product meets North American and European International standards.

**DIRECTIONS**

---

In order to better appreciate the advantages of PINGUIN (Concentrated) we recommend to purge and drain the radiator beforehand.

PINGUIN may be used directly or diluted in a same-proportion mix with water. If used directly, the anti-freeze's life is prolonged since it boils above 150°C and is used for cold weather. A diluted mixture will retain its anti-freeze properties, but will evaporate faster on rougher engine wear.

**PRECAUTIONS**

---

EYE AND SKIN IRRITANT, if contact with eyes or skin, wash with clean water for 15 minutes. If swallowed drink a glass of water or milk and call a Poison Control Center or doctor immediately.  
KEEP OUT OF REACH OF CHILDREN.

**PACKAGING**

---

5,10, 20 and 50 K. plastic containers
